Welcome to viaMINT!

Here, we introduce you to viaMINT, its structure, and its features.

You may use viaMINT to prepare specifically for studies in STEM subjects or to further develop your interest in mathematics, computer science, natural sciences, and engineering.

To help you navigate the available resources and keep track of your individual learning progress, viaMINT offers a **range of features** that we would like to briefly present to you here.

Choose your personalized learning interface!

When you first access the viaMINT platform, you can select a **degree program** or a **vocational training program** for which you would like to prepare specifically. A **self-assessment test** will help you assess your skills.

Based on your selection, you will receive recommendations for a personalized set of courses.

The **Standard** option provides access to the complete viaMINT course portfolio.

You can return to this selection menu at any time by clicking **"Change"**.

COMPANY

In DEFAULT mode, you can get to know viaMINT at your leisure and get a taste of the various learning modules.

If you already know whether you want to prepare for university studies, vocational training or a selection test in the medical-pharmaceutical field, you can start directly with a customized range of recommended learning modules. Select STUDY, SELECTION TEST or COMPANY here. You can change your selection at any time.

Language settings and logout

After clicking the round gray button displaying your initials, or AU as shown here for an *Anonymous User*, the profile menu will open.

Here, you can choose whether you would like the user interface and menus to be displayed in **German** or **English**.

Please note that the module content itself, including videos, exercises, and tests, is available only in German unless otherwise indicated.

If you **log out as an anonymous user**, you can register for an account. This will allow you to save your progress and return to your current learning status at a later time.

Selecting and working on a subject

All courses are organized by subject and can be accessed through the menu bar at the top of the page. This menu is always visible, allowing you to return to your *dashboard* „My viaMINT“ overview at any time.

When you click on one of the subjects - *Mathematics, Physics, Chemistry, Computer Science, or Engineering* - you will be presented with a structured overview of the courses available in that subject area.

After clicking on one of the color-coded course offerings, you will be prompted to enroll in the course once. Once enrolled, the course will appear on your *dashboard* together with the courses you most recently worked on.

Our recommendation: Test first, then learn what you need!

When you first access your dashboard, you will see the standard self-assessment tests as well as any learning modules and tests recommended through your personalized settings.

If self-assessment tests are available, we recommend completing them first. This allows viaMINT to provide you with **personalized learning recommendations** for your further studies, helping you start right away with the content that is most relevant to your individual needs.

Filtering by subject or category

By default, your dashboard displays learning modules from all subject areas. You can use the buttons in the filter bar to show or hide individual subjects or categories (such as courses and assessment tests).

By clicking the **search icon** (magnifying glass), you can search for specific learning courses and quickly find the content you are looking for.

Filtering by outstanding or recommended Modules

By clicking the menu button (three dots), you can choose whether to display: all modules, including those you have already completed; only modules that are still outstanding; or only modules that have been recommended for you. This allows you to focus on the learning content that is most relevant to your current needs.

Any questions?

Under **About viaMINT**, you can learn more about us and our cooperation partners, as well as find ways to get in touch with us.

We also welcome your feedback on our learning modules. At the end of each course, you will find a link to a **feedback form** where you can share your thoughts and suggestions.

If you notice anything unusual or discover an error, please let us know at viamint@haw-hamburg.de.

Thank you, and we hope you enjoy learning with viaMINT!
